## BETTER AIMING FROM EVERY ANGLE

With the Sound Metrics ARIS Rotator AR<sub>3</sub>, easily and accurately aim the ARIS Explorer using 3-axis control of pan/tilt/roll.

The AR<sub>3</sub> enables more complete imaging of the surrounding environment. Varying the roll angle on a target provides a 3D-like perspective and also rolls the sonar to the best possible angle to image the seafloor, ship hulls, dam faces, etc. Manual and automated control is simple using the intuitive ARIScope software interface. Both the sonar and the AR<sub>3</sub> operate on a single standard cable. For more information, visit [www.soundmetrics.com](http://www.soundmetrics.com).
